## **Sleep HealthCenters Continues to Expand Due to Growing Need, Opens New Sleep Medicine Center in Medford**

### ***New Facility Provides Convenient Local Evaluation and Treatment for Those Needing Help With Sleep-Related Problems***

MEDFORD, Mass.--(BUSINESS WIRE)--Sleep HealthCenters<sup>®</sup>, a network of specialized sleep medicine centers and the largest provider of such services in Massachusetts, has announced that a new clinic and sleep diagnostics lab has opened in Medford, MA. The opening of the latest Sleep HealthCenter is in response to the growing demand for sleep-related diagnostics and treatment -- the result of increased awareness about sleep problems and the desire to treat them before they lead to other health issues. It is estimated that 40 million Americans have sleep disorders.

The 5,800 square foot Medford Sleep HealthCenter is located at 200 Boston Avenue, Suite 3000. It provides the full range of services for patients with such sleep disorders as insomnia, obstructive sleep apnea (OSA), narcolepsy, excessive daytime sleepiness, and restless legs syndrome. This new center, also affiliated with Hallmark Health, replaces the Malden Sleep HealthCenter which, in 2006, had 6,000 patient visits.

Services include physician evaluations, overnight sleep studies using state-of-the art medical technology, and provision of complete follow-up services and equipment. This includes patient counseling and education, prescriptions, and special set-ups for OSA patients, such as CPAP (Continuous Positive Airway Pressure) devices. The facility features individual consultation rooms and 6 bedrooms where sleep studies are conducted. Each bedroom has a comfortable, full-size bed, a television and a private bathroom.

Kelly A. Carden, M.D., Medical Director of the new center said, "We're very pleased that our new facility enables us to offer many sleep diagnostic and treatment options to those in Medford, Malden, and the surrounding area. Our staff's extensive experience means that patients can be confident they will receive only the highest level of quality care when they visit us."

Dr. Lawrence J. Epstein, Sleep HealthCenters' Medical Director, noted, "We encourage anyone who thinks they may have a sleep disorder to see us at our new Medford center for an assessment, as we now know that other serious, and even life-threatening, problems can result when sleep disorders are left untreated. These include hypertension, stroke, and automobile accidents. We're here to help individuals not only solve their sleep issues, but also to help them avoid these related problems."

Sleep HealthCenters maintains close contact with a patient's own referring physician throughout the entire process, providing reports on a regular basis. Services are covered by most medical insurance plans.

Paul S. Valentine, Sleep HealthCenters' CEO and President, commented, "Our goal is to add Sleep HealthCenters throughout Massachusetts, as well as expand outside the state, in order to bring our services as close as possible to those who can most benefit from them. We offer not just the best sleep medicine services in the industry, but we are proud to bring with us affiliations with highly respected medical establishments. We want Sleep HealthCenters to be the name people think of first in sleep medicine, and the name that people can trust."

Sleep HealthCenters has nine other locations throughout eastern Massachusetts and one in New York and is affiliated with the Brigham & Women's Hospital, Beth Israel Deaconess Medical Center, Faulkner Hospital, Hallmark Health, McLean Hospital, New England Sinai Hospital,

Chadwick Medical Associates, UMass Memorial Medical Group, and Beth Israel Medical Center in New York.
