Sleep HealthCenters has opened the doors of a new clinic and sleep diagnostics laboratory in Medford, Mass. The opening of the latest Sleep HealthCenter is in response to the growing demand for sleep-related diagnostics and treatment and increased awareness about sleep disorders.

The 5,800-square-foot Medford Sleep HealthCenter is located at 200 Boston Avenue, Suite 3000. It provides the full range of services for patients with such sleep disorders as insomnia, obstructive sleep apnea (OSA), narcolepsy, excessive daytime sleepiness, and restless legs syndrome. This new center, also affiliated with Hallmark Health, replaces the Malden Sleep HealthCenter, which had 6,000 patient visits in 2006.

"Our goal is to add Sleep HealthCenters throughout Massachusetts, as well as expand outside the state, in order to bring our services as close as possible to those who can most benefit from them," said Paul S. Valentine, Sleep HealthCenters' president and CEO. "We want Sleep HealthCenters to be the name people think of first in sleep medicine, and the name that people can trust."

Services include physician evaluations, overnight sleep studies, and provision of complete follow-up services and equipment. This includes patient counseling and education, prescriptions, and special set-ups for OSA patients.
